HI-EARLY RED DELICIOUS

(Patent Applied for)

Neff Strain Delicious

Commercially proven bright red sport that **colors three weeks early**

HI-EARLY is a super sport of Red Delicious that has proven its ability to color three weeks early through three generations of commercial production. Discovered in the heart of Washington's Appleland, ten years have been spent in proving and testing this sport before its release to commercial fruit growers.

HI-EARLY retains its bright red color through harvest without getting blackish red in spite of its early coloration. Color begins with formation of fine stripes that seemingly flow together to form a solid pattern considerably ahead of harvest.

All budwood is selected from third generation trees of proven production and early color.
